Gambling Platform — Executive Overview

Betting activity, financial transactions, and player engagement | Synthetic data

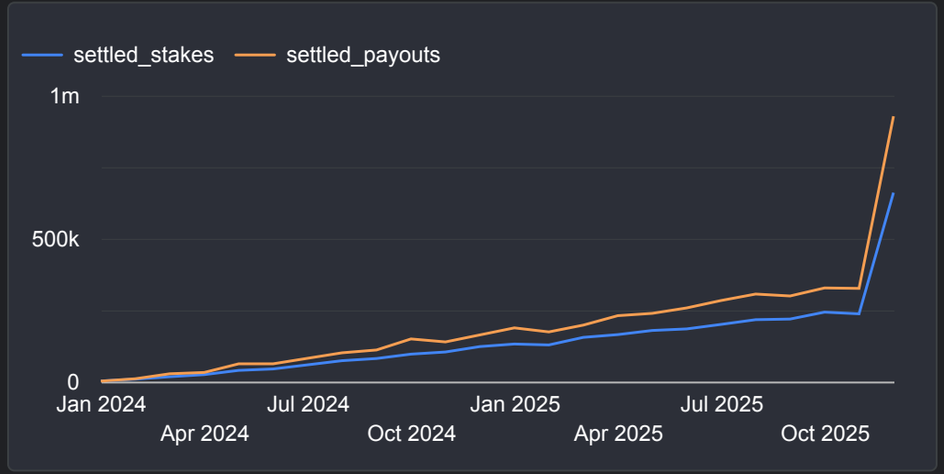

Total Bets	Winning Bets	Losing Bets	Void Bets
100,000	29,115	66,936	3,949

Monthly Betting Activity

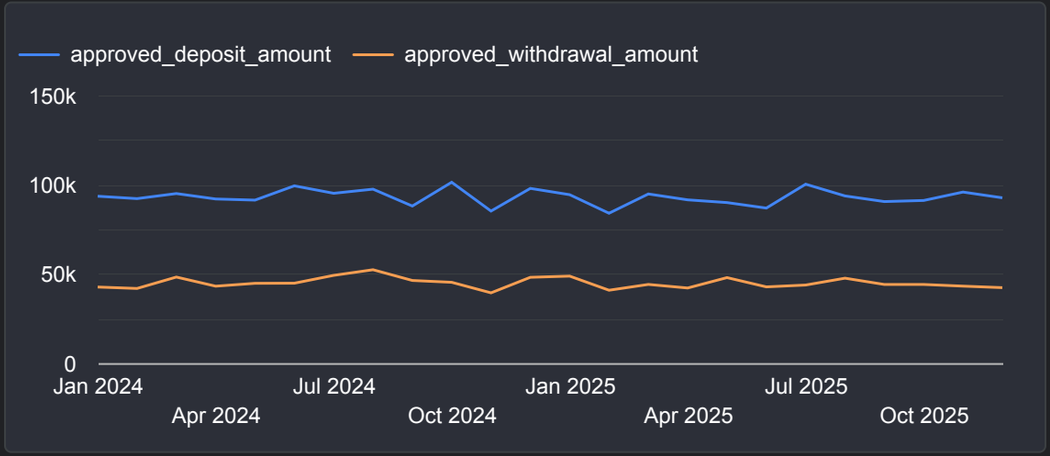

Data quality note: Betting activity spikes in December 2025 due to an unusual concentration of records at a single timestamp. This requires further validation; December figures should be interpreted with caution.

Monthly Settled Stakes vs Payouts

Monthly Approved Deposits vs Withdrawals

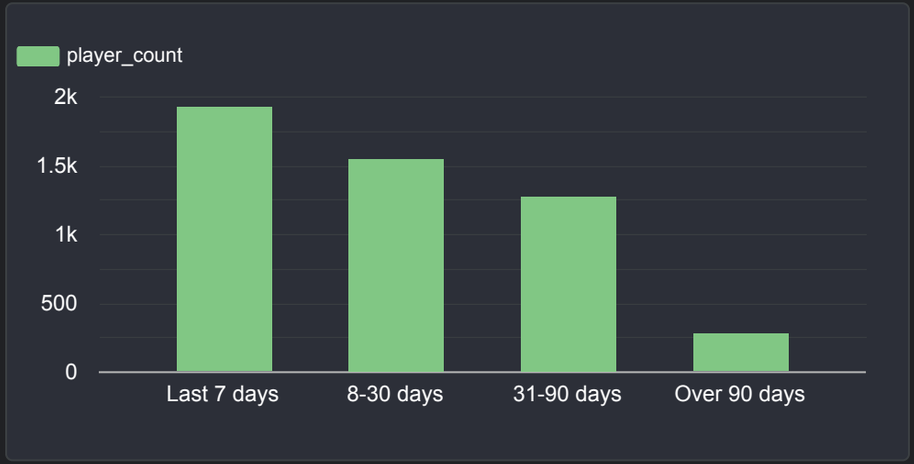

Net Transaction Inflow
$1,155,706.85

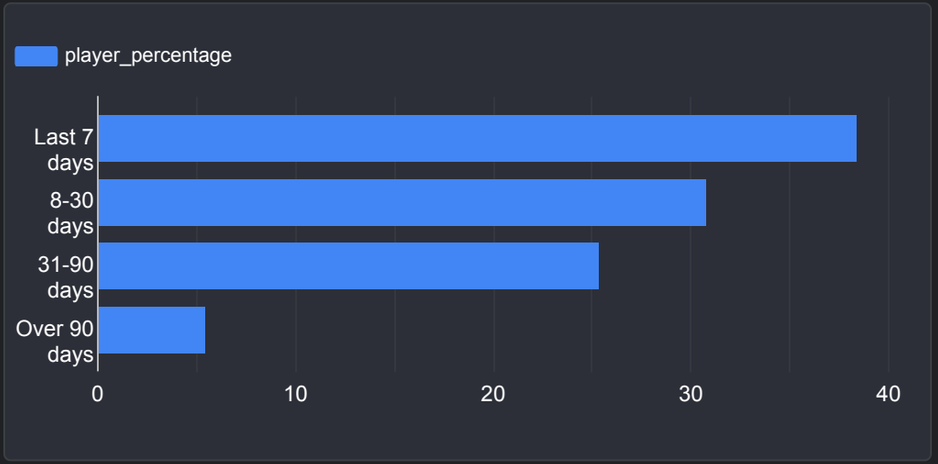

Player Insights

Total Players	Players with Last Bet Over 30 Days Ago
5,000	1,541

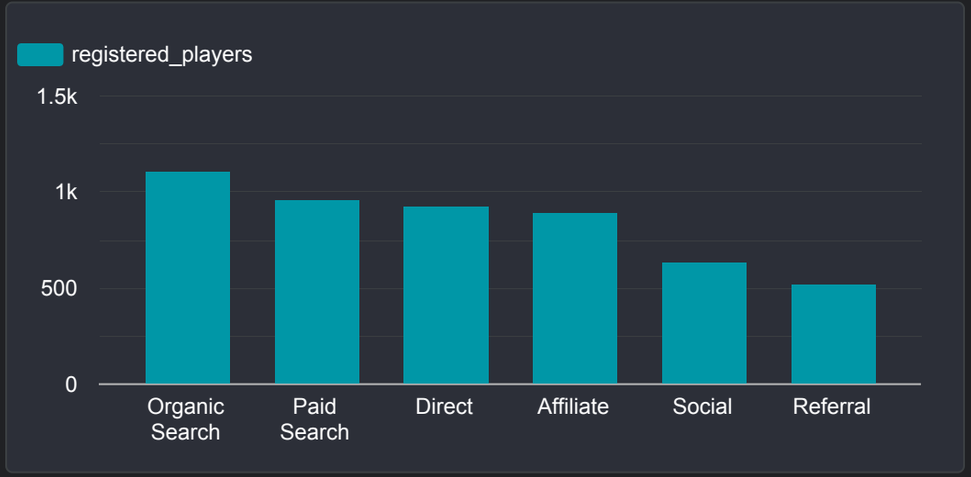

Players by Last-Bet Recency

Share of Players by Recency

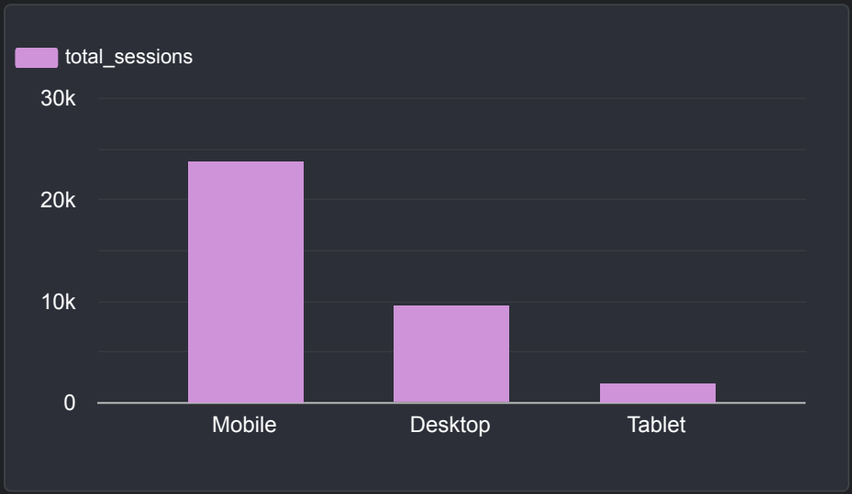

Players by Acquisition Channel

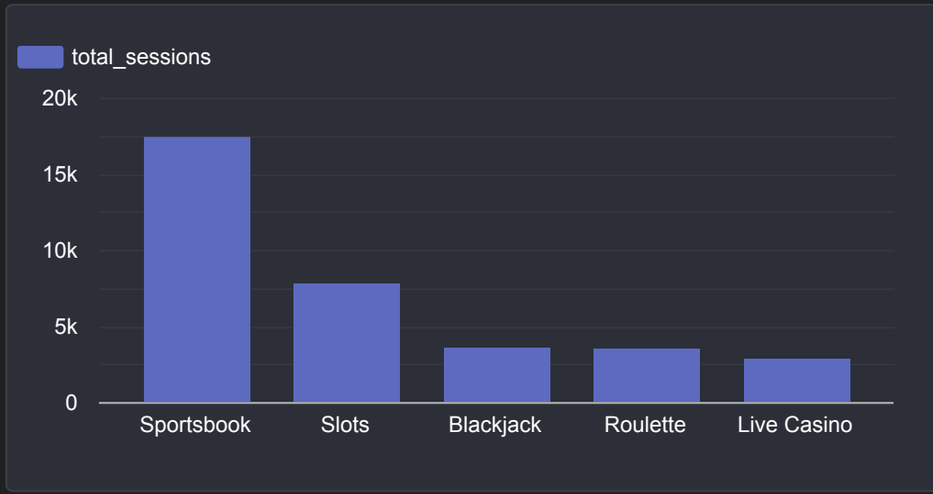

Organic Search has the largest number of registered players. Approximately 69% of players placed their last recorded bet within 30 days of the dataset's latest bet date. These are historical activity measures, not confirmed current engagement or churn.
